EXPERIENCE

Software Engineer

Devigital Systems

2021 - Ongoing Pakistan

Devigital Systems is a full-service software development company founded by veterans of the IT Industry with decades of collective experience and a vision of transforming brilliant ideas into incredible products.

What I learned from Devigital Systems

- Got hand's on experience and the opportunity to work on different cutting-edge technologies for both frontend and backend.
- got experience to work with team
- How to manage stress and delivered task on time
- Client communication
- Follow the latest coding standards or techniques
- Team Collaborations
- Help each other for Growing

PROJECTS

Squeazee

This project is a console for building, managing, and deploying simple landing pages or microsites called Squeeze pages. This is the project behind the site <https://squeeze.page.io>.

Technologies that were used in this project:

- Reactjs
- Material Ui
- API Integration
- Redux (redux-logic & redux-saga)
- Nodejs
- GraphQL
- PostgreSQL

My responsibilities:

- Managed both frontend and backend
- Design and Development
- API Integrations
- Testing
- Code Optimization for better experience

Signa Capture

Platform to make and get customized designed Albums/Images for students i.e. images of all students with their name and signature as memory or make ID cards of students.

Technologies that were used in this project:

- Reactjs
- Nodejs
- Expressjs
- PostgreSQL
- GraphQL
- Material UI
- Redux(redux-logic & redux-saga)

My Coordinations:

- I worked with the team as a frontend engineer
- Design and Development
- API Integrations
- Code Refactoring

EDUCATION

Bachelor's of Science In Computer Science

Lahore Leads University

2015 - 2019 DHA-PH-5

GPA

3.0 / 4.0
